

THE WAY... TO GO AHEAD

## Welcome to Delhi Public School

Most of you are on the threshold of a metamorphosis. From being just loving and doting parents, your role is now extending to that of an educator and this change brings a lot of anxious moments. Perhaps the most important decision that you have to make is about the kind of education you want to give your child and where.

This is where we come in...

### Why Delhi Public School...

Delhi Public School Society manages one of the largest chains of public schools in India and abroad with over 200 members. Over a period of sixty years Delhi Public Schools have gathered unmatched experience and knowledge in managing K-12 education. This depth of experience is reflected in the way education is imparted at DPS. DPS believes in not merely educating but in nurturing each student as the leader for tomorrow - a fact borne out by the eminence of the alumni of this school chain all over the globe.

### What we offer...

DPS under the aegis of DPS Society, delivers world-class holistic education to its students. Our pedagogy is:- imparting knowledge by instilling confidence and a spirit of scientific enquiry. Students are encouraged to pose questions to the teachers and not just the other way round because we believe that a curious mind is the receptacle of learning. We encourage young children to explore the outside because we believe that learning cannot be confined within the four walls of the classroom and that there is no better teacher than nature.

We have embraced technology and innovation with an open mind because children of this millennium have to master technology and not become its slave.

Our efforts are backed by the ergonomically and scientifically designed campus which is a learning space as a whole. Emphasis has been laid on utilising natural resources to the fullest. Students are taught the importance of environmental conservation through conscious efforts towards reducing, reusing and recycling of waste.

### A Proven Curriculum

DPS follows the syllabus as prescribed by the CBSE. It is our constant endeavour to direct each child to become a motivated lifelong learner by experiencing the joy of discovery and the ownership of results. Our curriculum has been structured to ensure that knowledge is imparted through a combination of resources and techniques, thus making the learning process exciting and easy to comprehend. Classroom teaching, multi-media workshops, exchange programmes, co-curricular activities and excursions help children gain insight and knowledge at various levels.

From Class IX students are honed towards focusing on their aptitude for higher studies. Special classes and workshops by renowned resource persons are organized so that senior

students can recognize their potential and exploit them.

### Key Focus – Information Technology

E-learning is an integral part of the DPS curriculum. To ensure this, IT plays an important role in providing a modern environment for children to learn and grow. A network of computers on campus ensures that benefits of this are accessible to every individual on the campus. Even the younger students are exposed to computers and learn basic computer skills. Special multi-media based softwares are used to enhance the students' visual perception of geometrical shapes, cognitive skills and language.

Smart Classes with Smart Boards give teachers access to a huge data of interactive multimedia content that makes grasping complex concepts easy.

### Evaluation – To Strengthen Every Child's Learning Curve

An important area where DPS differs from other schools is in its evaluation methodology. The focus is on the growth and development of overall personality of each child. Assignments are given on a regular basis keeping in mind the

academic requirements. Every child is also closely observed and monitored for extra-curricular abilities. Parent-teacher meetings provide an opportunity to discuss each child's development.

### Community and beyond....

Since inception, DPS has strived to promote and preserve our heritage and culture, divine music and dance. Towards this, students are encouraged to participate in cultural events that are organised at regular intervals on the school campus. Other regular school initiatives include anti-cracker and anti-pollution campaigns, environment protection awareness and other activities to make students aware of the fact that each individual has to contribute towards sustaining our fragile ecology.

DPS also takes its corporate social responsibility seriously. In this initiative it is assisted and guided by a social sector organisation called Sakaar Outreach. Jointly with this NGO, DPS provides free education to children from the lesser privileged sections of the society, after school hours. These children are also provided with food, free books, stationery, satchel, shoes and uniform.
